

# Cornell Notes

## Structure for class content & your thoughts

### Recall Column

Make notes about things to look at later. Jot down study questions, words that stand out and list ideas that may be connected.

### Note taking column

Take notes here during class. Add in questions to clear up confusion and use later for test preparation.

Cover this column and see how much you can remember. Consider why the content matters and how it relates to what you have already learned. Review this column each week up until the exam.

### Summary Column

Write a short summary of the lecture notes above.
